

ABOUT US

My name is Inés and I am passionate about jams and olive oils. Creator of this Project, we have been working continuously, taking care of every aspect of the selected products, such as oils and jams for the full satisfaction of our customers. I have always loved to travel through nature, the fields and the various olive groves, something I am passionate about.

Then I had the opportunity to meet people who are very dedicated to their fruit, vegetable and olive tree crops, in order to make delicious jams in a traditional way, and the concern arose to reach a clientele that knows how to appreciate what the land has to offer, such as jams and oils.

With our oils we can give a special touch to our meals and above all be able to soak a piece of bread with one of our favourite oils, accompanying it with some crushed tomatoes and a pinch of salt. Each jam can speak for itself depending on the nuances of flavor that the fruit brings us, as well as its sweetness that makes us fall in love with it every time. As we get to the different types of oils such as aromatic, spicy... we move to almond fields... this adventure enchants you and takes you to unimaginable places.

The gourmet basket has been a Project that has always been in my mind and now we have been able to make it a reality in order to share with you our tastes and preferences through the different gourmet products that we will offer. Every week we will share various news with you through our website, instagram, facebook, twitter.

See you soon and enjoy our gourmet –basket, Inés.
